

Nautilus™ 2.0

Ceramic Filtration System

Today, implementing a water reclamation process into a laundry plant is no longer a consideration, but a must in order to stay competitive. The Ellis Water Solutions line of water recovery systems provide pivotal reuse technology that is proven to deliver laundries greater control over water quality while diminishing overall operating costs.

AVAILABLE WITH UPTIME™

IMPLEMENTING CERAMIC ULTRAFILTRATION MEMBRANE TECHNOLOGY

Our closed filtration systems can tackle the alkaline wastewater streams that a conventional process cannot, including high levels of TSS, oil and grease, proteins, colloids, heavy metals, and detergent laden chemicals.
