

OPEN POCKET

DESIGNED TO OPTIMIZE

The Ellis Open Pocket Washer/Extractors are designed to optimize production from every angle; pounds per operator hour, pounds per square foot, pounds per unit of energy, easier turn around with larger doors and all with a better finished product. You need a machine designed from the ground up to optimize efficiency, from loading to unloading.

The Ellis Open Pocket Washer/Extractor is loaded with features that accelerate the wash cycle and improve turnaround times. A capacity of up to 1,000 lbs ensures that the Open Pocket can fill any need. These features combined with an integrated 'QT' Quick Turn loading hopper offers automation, safety and productivity.
